

## **Statement from Emad Farag**

My personal license been suspended but the company still registered.

The crack on the driveway retaining wall that you keep showing on your show caused by owners who planted huge palms in the very narrow area between the building and the retaining wall instead of small shrubs as the plan stipulated and there are engineers reports confirming that.

Also the scope of work for 4 S Construction doesn't include any landscape structure works which contributed to all the damages to the common area which you produce unfairly on your show as 4 S construction's responsibility.

At the moment the case still between lawyers and we hope to get some justice for all the damage we incurred.
